

INTELLIGENT INSIGHT INTO YOUR WATER SYSTEM

The Sentryx™ Water Intelligence platform provides utilities with unique insights into the health of the distribution system. Using Mueller® fire hydrants as a communications backbone and battery powered state-of-the-art sensors, utilities will be able to understand how their distribution system is performing like never before. The Sentryx™ software will record and display important data from water sensing technology including pressure, flow, leak, chlorine and pH. Leveraging over 160 years of industry experience and state-of-the-art machine learning technology, your data will be transformed into insights that can be used to make critical decisions about your operations and maintenance programs.

Introducing Sentryx™ Water Intelligence

MUELLER

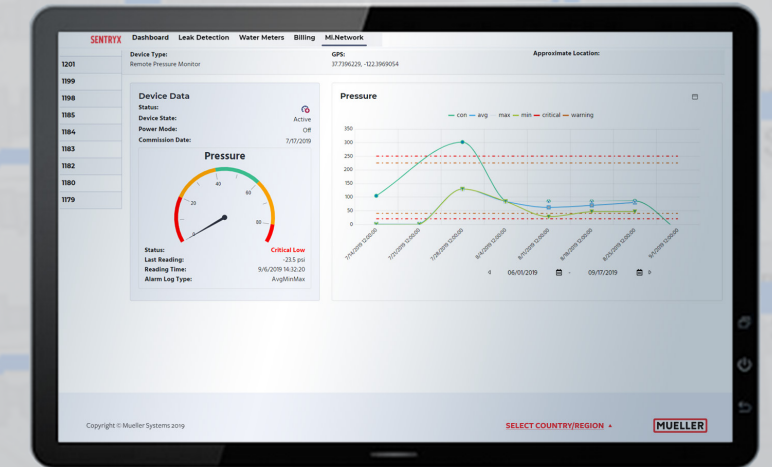

Welcome to an advanced technology platform that will change the way your utility will look at your water and its infrastructure system. Sentryx™ Water Intelligence is a unique hub of information that helps with analytical and strategic decisions, as well as day-to-day water distribution and utility operation. Together, information and data is true power. Data is easily obtained via any access point along the pipe including sensors, meters, hydrants, valves and more. Using Mueller® products such as the Centurion® fire hydrants, Jones® fire hydrants, Hydro-Guard® smart flushing systems, remote disconnect meters and EchoShore®-DX leak detection, utilities can gain unique insights into the health of their water system which is not available anywhere else in the market. Mueller fire hydrants are used to house communications equipment, eliminating the need for expensive infrastructure installed on the property of other utilities. Sentryx™ Water Intelligence is the technology you need to be proactively in control of your water management system to increase the life of your infrastructure and lower future capital cost.
