

ENERGY CAPITAL

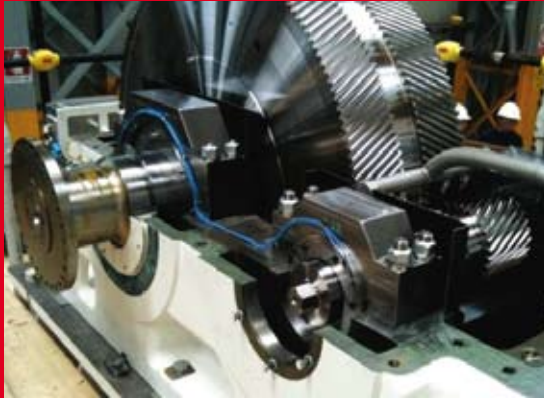

Your Valued Partner for Power Generation

About Energy Capital

Energy Capital is an engineering company with EPC capability in the field of power generation:

Appointed as the Asia Pacific representative for Flender-Graffenstaden, Turbine Services Limited (US), WAMAR International, Scherzinger and Acquip related gas turbine products and services.

Together with our different suppliers, Energy Capital provides premium products and services to Generation Companies located in Asia Pacific, Indian Subcontinent and Middle East. See the services and products listed below.

TSL, A supplier of non OEM replacement parts for General Electric Company heavy duty gas turbines.

WAMAR International, global provider of premium services and products in the field of Power Generation, Oil and Gas.

Its subsidiary, Wamar Engineering with advanced facilities and technology provides universal repair and manufacturing of critical parts for combustion systems in power industries.

FLENDER GRAFFENSTADEN

Manufacturer of high efficiency gear units used in all processes in power plants, refineries, offshore and onshore oil and gas installations, petrochemical and industrial process plants around the world.

SCHERZINGER PUMP TECHNOLOGY

SCHERZINGER provides for high-quality gear pumps and valves, flow dividers solutions.

TURBOTECT provides specialty products and services for gas turbines. Gas turbine fuel treatment and gas turbine compressor cleaning.

Specialized in rotating equipment alignment services for the power generation, oil & gas and petrochemical industries. Also offers 3D Scanning and Metrology field services, using the innovative technologies from FARO.

A Brief History of Energy Capital

Energy Capital can trace its roots back to **ELMAR Engineering** once a respected brand in Asia Pacific for GT Services and EPC projects.

ELMAR Engineering started in 13 Aug 1983 and eventually became the largest turbine repair work shop in Asia Pacific during its time. It was eventually bought over by GE due to its success.

Energy Capital was set up by the founder of ELMAR Engineering. It became active serving the market after the sale of ELMAR Engineering.

We are proud to say that we have maintained our links with many of our principal suppliers for over 30 years.

Some of Our Recent Projects

Together with our partners, we have completed many installations, provided expertise and technical support. Here are some examples of our projects:

Flender-Graffenstaden Gearbox change

Gas turbine Rotor Refurbishment

A Hitachi Load Gear-Box replacement

Below, the installation of a gearbox as well as the integration of vibration control system.

Major inspection of gas turbine.
