

Energy Management

ISO 50001

Supporting organisations to use energy more efficiently

Effective energy management isn't just great for your business, it's also now becoming a requirement for companies of all sizes. The best way to achieve it is with ISO 50001.

Using energy efficiency helps organizations save money as well as helping to conserve resources and tackle climate change. ISO 50001 supports organizations in all sectors to use energy more efficiently, through the development of an energy management system. This is where Cotopaxi can help.

Cotopaxi's very own management system Strata has the built in functionality required for ISO 50001 certification. With Strata's unlimited capability and Cotopaxi's expertise and knowledge, we work closely with our valued clients to reach the ISO 50001 standard.

If you are a UK organisation and looking to work towards ISO 50001 accreditation, this will also contribute in helping your company to become compliant with the ESOS requirements.
