

CAD TEXCELLE PRO PRINTED FLOORING

Professional Software Training

NedSense NedGraphics helps clients to realize their goals. To do so, we use our expertise and know-how with regards to the textile & apparel market. With over 30 years of experience in the textile industry, NedSense NedGraphics is able to bring integration, tailored for your core business. An important part of our approach entails working in organized teams of different departments. We assist and help to integrate to achieve your goals. NedGraphics trainers are certified to give the training and are always up to date with the latest versions.

Industry: Textile Design for floor covering (Printed rugs)

Customer implementation contains:

- Learn how to create rug designs from scratch, reduce scanned designs and manipulate to production or presentation ready.
- Develop rugs and wall to wall designs within the restrictions of production machinery settings for Chromo Jet machines.

Training program contains:

- Environment introduction Texcelle Pro.
- Set-up correct sizes for different rug qualities.
- Learning how to use all creative design tools like selection tools, smoothing, repeats for borders, add/remove lines for borders, copy and mirror functions etc ...
- The use of transparency and protect colors.
- Inserting motifs into other designs (fill, copy, color wizard)
- Special effect drawing tools (spray, gradient fill, contour, conditional color change etc ...)
- Use of the color picker for making new color ways, changing colors and adding colors ...
- Other useful information, shortcuts and user specified settings.

Customer benefits:

- Control in-house of the creation and production output for any rug or wall to wall designs
- Increase, wider creativity and volume for printed carpets.
- Increase in creating different rug designs sizes and colors resulting in more choice and customer made collections.
