# DNA Ladder Plus

*Ready-to-Use Ladders for Electrophoresis*

- ✓ Bright, Sharp Bands for Accurate Sizing
- ✓ Precise DNA Concentrations
- ✓ Ready-to-Use

50bp Ladder Plus contains 13 double stranded DNA bands with molecular weights ranging from 50bp to 1000bp. The 250bp and 500bp fragments are bright to allow easy identification and the ladder is supplied in a ready to use formulation which can be added directly to the gel.

100bp Ladder Plus contains 14 double stranded DNA bands with molecular weights ranging from 100bp to 3000bp. The 500bp and 1200bp fragments are bright to allow easy identification and the ladder is supplied in a ready to use formulation which can be added directly to the gel.

1kb Ladder Plus contains 15 double stranded DNA bands with molecular weights ranging from 100bp to 10,000bp. The 500bp and 3000bp fragments are bright to allow easy identification and the ladder is supplied in a ready to use formulation which can be added directly to the gel.

Introducing our new range of ready to use DNA ladders for electrophoresis. These plus range ladders are available in 50bp, 100bp and 1kb size and offer precise standard and bright reference bands. All fragments are precisely mixed and quantified during production and the ladders are supplied premixed with loading dye.

## Ladder Ranges

50bp Ladder Plus	50 - 1000bp
100bp Ladder Plus	100 - 3000bp
1kb Ladder Plus	100 - 10,000bp

£29.50 / 50µg
