TECHNICAL STUFF

Metronet leased circuits are terminated with a managed Ethernet switch enabling 24 x 7 monitoring of your service at all times to ensure that the 99.95% Service Level Agreement is achieved. ADSL backup is also available for additional resilience.

Following installation, you will be given a completion document designating the IP range, Gateway, and DNS settings. If you are less familiar with networks, Metronet will help you to get your services up and running.

> "My initial apprehension regarding the impact that inclement weather conditions might have on the wireless connection was unfounded as the circuit has proved resilient in the face of high winds and heavy rainfall." **Mark Huddart, IT Manager, Image Metrics**

> "I found it useful not to be dealing with a monolithic communications giant as I had easy access to engineers and, if necessary, the CEO, who impressed by taking a personal interested in the project." **Marc Humphrey, Group IT Manager, LPC Living**

> "Given the unusual complexity of the network configuration and taking into account the need for multiple supplier coordination, I was impressed that the network went live within one month of the initial consultation." **Chris Styles, IT Manager, Pannone**

> "The capability of the network connection is tested every day with time sensitive applications such as VOIP and IP TV being visible barometers by which Users assess the quality of the school's internet connection." **Alex Bushby, William Hulme's Grammar School**

200 Mbps	£4000	£2500	Included	99.95%/4 hrs

*Installation/Monthly Rental.

Notes

1. Bandwidth in excess of 200Mbps is available. However, Metronet normally prefers to discuss these requirements directly before providing costs.

2. All services are installed using a bearer that is twice the capacity of the bandwidth ordered. For example, if you order a 5 Mbps connection, Metronet will install a pipe with a minimum of 10 Mbps capacity. This makes any upgrade a simple and speedy process.

3. All costs are correct at the time of publishing and are exclusive of VAT.

4. Payment terms are monthly in advance.

WITH METRONET, HIGH-SPEED INTERNET ACCESS IS...

FASTER
DATA RATES UPTO 10GBPS

EVEN FASTER
WITH ZERO 3RD PARTY DEPENDENCE METRONET OFTEN INSTALLS WITHIN DAYS

CHEAPER
BY UP TO 80% WITHOUT QUALITY COMPROMISE

MORE RELIABLE
WITH A 24x7x365 99.95% SERVICE LEVEL AGREEMENT

With Metronet saving you up to 80% compared to traditional network providers without quality compromise, it is hardly surprising that Metronet is the only profitable wireless ISP in the UK.

Metronet's Service Level Agreement and support marks an industry first. Metronet's engineering and support staff operates 24x7x365 and end-to-end ownership of its network ensures that Metronet delivers against its promises.

Metronet un-contended, fully symmetrical leased line services are being delivered in your area using carrier grade point-to-point wireless radio systems that make it possible for you to have your service (1 Mbps to 1 Gbps) installed within five days of placing an order.

Metronet UK Metro Ethernet Services Include:

High-Speed Internet Access
Point-to-Point Private Connectivity
VPN & MPLS VPN Services
QinQ Ethernet Services
Resilient Ethernet Circuits & Tempory Ethernet Connectivity
Ethernet Connectivty between Data Centres
Managed Security Services & Virtual Managed Security Services

If you are thinking of purchasing a dedicated leased line, or if you have existing circuits for which the contract is coming to an end, you stand to save money and improve the Quality of Service that you and your users enjoy.

Metronet aims to provide at least double the bandwidth for less than half the price when compared to legacy network operators and ISPs.

Metronet also offers a fully managed virtual firewall solution, point-to-point leased lines, and fully integrated MPLS solutions.
