ABOUT US

FLIGHTPARTS headquartered in Xiamen, China, is a multi-disciplined aircraft component MRO service provider with facilities located in Xiamen and Xi'An, China as well as Porto Alegre, Brazil.

Xiamen, China

Our facility houses two strategic business divisions; **landing gear MRO** and **Inflight Supplies**.

The **landing gear** facility offers full comprehensive MRO services for the landing gears installed on the Airbus, ATR, and Boeing platforms. Our certifications include FAA, EASA, CAAC and a long list of country-related Civil Authority Approvals.

Inflight Supplies specializes in the supply of tailor-made inflight products such as headsets, catering trays, blankets, and sickness bags. We are currently supplying to more than 20 airlines worldwide.

Xi'An, China

Flightparts **Aerostructures**, located in Xi'an, China, supports a wide range of regional, wide body, and narrow body aircraft providing both shop overhaul and on-wing repair services for **composite and metallic structures** and possess various capabilities including but not limited to; autoclave assist and out-of-autoclave repair.

Porto Alegre, Brazil

Flightparts acquired the component MRO business from TAP M&E in February 2019 and renamed it Flightparts Brazil S.A.

Porto Alegre **landing gear** capabilities complemented with what we currently have, and propelled us into another spectrum of the MRO business for **Engines, APUs, Avionics and Accessories**, offering an alternative choice to our customers.

With a combination of three plants and decades of experience in the MRO business, employing more than 380 employees worldwide, Flightparts is well poised to accelerate to greater heights, giving global customers access to good quality MRO services at extremely competitive prices.
