

EXTRA STRONG URINAL CAPS

PRODUCT DESCRIPTION

Ecobug® Extra Strong Urinal Caps for use on watersplashed & waterless urinals. Ecobug® Cap contains naturally occurring microorganisms, which break the urine up into its components and neutral molecules. It's easy to use. The urinal stays clean and odour-free plus protects our valuable drinking water reserves.

CORE BENEFITS

- easy to install without costly investment
- for use on watersplashed & waterless urinals
- reduces water consumption by up to 98 %
- saves high water & sewage costs
- prevents & eliminates odors by slowly releasing microorganisms into the urinal
- leaves a fresh, pleasant cherry/almond aroma in washroom area
- reduces the formation of urine scale and limescale deposits, increases user satisfaction and reduces the cost of maintenance
- specially formulated for use with the ecobug® High Performance Washroom Cleaner (= 1 system)

AREAS OF USE

- For use on traditional watersplashed urinals and on already waterless ones
- Optionally use with urinal screen or adapter conversion kit (waterless urinals)

EXTRA STRONG URINAL CAPS

HOW DOES IT WORK?

Ecobug® Cap contains naturally microorganisms (=good bacteria like the kind found in yoghurt or cheese, for example), which break the urine up into its components and neutral molecules. Ecobug® Cap is simply placed in the urinal and the water supply is shut off. Even the small amount of 2-3 litres of water for daily cleaning is sufficient to activate the bacteria so that the urinal remains clean.

The microorganisms are released by ecobug® cap dissolving slowly. That way, the components that are responsible for the formation of urine scale are broken up. At the same time, the bad bacteria that cause the horrible odour are destroyed.

DIRECTIONS FOR USE

Take one Ecobug® Cap from the tub and close lid again.

Watersplashed urinals: Place Ecobug® Cap into the urinal and stop or reduce water inflow to a minimum of flushes. For perfect fit, use ecobug® urinal screen as an option.

Waterless urinals: For your waterless urinal you need a replacement adapter and odor trap. Check the brand & model of your urinal or take a picture of same and contact CSE Clean Solution GmbH. We will send you the right adapter conversion kit for use with Ecobug® Cap.

Follow the Ecobug® cleaning instructions for the best possible maintenance.

PRODUCT SPECIFICATION

Contains: Fresh fragrance, special microorganisms & solvents

pH-value: 4-5

PU: 10 & 25 pcs.
