

EVENT PROGRAM

03 • 03 • 2014

INTRODUCING THE FIRST EVER

NORTHERN ONTARIO MINING SUPPLY SHOWCASE

To all companies, business owners, executives, dignitaries and other special guests from around the world, we welcome you to the Northern Ontario Mining Supply Showcase.

This event is the result of a longstanding partnership between various communities and organizations that recognize the unique potential which PDAC affords for the promotion of Northern Ontario and its businesses to the world. Spearheaded in 2010 by the Township of James and the Elk Lake Community Forest, the collaborative effort has since grown to include partners from throughout Northern Ontario. Over the years, activities undertaken by the group have included a presence in the Ontario Pavilion, hosting hospitality suites and separate on-site exhibits which have gone so far as to feature live theatre presentations!

This partnership has since evolved into the Northern Ontario Mining Supply Showcase event that you are attending today. While here, we encourage you take the opportunity to network, cultivate relationships, and generate business opportunities and leads with the over thirty-five participating exhibitors. Learn first-hand why Northern Ontario is deemed to be a centre of mining excellence and, while you're at it...enjoy some of our famous Northern hospitality!

Sincerely,

**The 2014 Northern Ontario Mining Supply Showcase
Organizing Committee**

OUR COMPANIES

NOTES

ACCURASSAY LABORATORIES INC.

accurassay.com ▪ THUNDER BAY, ON

Accurassay Laboratories is an independent, privately owned company with 30 years of experience in the mineral analysis business in Canada. Our goal of providing Accurate assays is achieved through our focus on operational excellence within the lab, embodying three things:

Automation: *Implementing the control of equipment and processes with advanced technology.* Accurassay's automated systems raise the industry bar for consistent quality while delivering benefits in employee health and safety.

Accreditation: *Formal certification of performance to a professional or regulated standard.* Accurassay's methods are accredited to ISO 17025 by the Standards Council of Canada (SCC).

Assiduity: *Great and constant diligence and attention.* Accurassay's people and systems are driven to deliver on our quality and service promises.

CMM

cmm-inc.ca ▪ TIMMINS, ON

CMM is a maintenance and millwright services company founded in 2007. Over the years, the company has established itself in the mining, industrial and forestry sectors. Specialties include mechanical contracting, custom steel fabrication, process piping, millwright and related services.

CMM provides millwright and maintenance services for projects of various sizes and degrees of complexity within the Mining, Forestry and Industrial sectors throughout Northern Ontario. They pride themselves on being able to tailor services to suit client needs.

CMM is focused on providing a professional maintenance, repair and construction service that offers quick and reliable response to break downs and works hard to reduce machinery down time. "Our goal is to work as quickly and safely as possible to achieve optimum levels of production efficiency."

Christen Morandin

CANADIAN SHIELD CONSULTANTS AGENCY

canadianshieldconsultants.com ▪ ST-CHARLES, ON

Canadian Shield is a highly specialized and customer focused environmental engineering firm providing customized solutions to our customers' environmental engineering challenges.

Established in St. Charles Ontario in 1996, Canadian Shield provides turn-key on-site wastewater and water treatment systems for clients in mining, forestry, tourism and residential. The firm engineers, designs, manufactures, installs and maintains the self-contained systems, which are primarily used in remote areas inaccessible by road. In addition, the company provides the following environmental engineering services including assessments, feasibility studies, consulting and engineering design. Recently, Canadian Shield has expanded its core services to include spill response and aviation services. Our current customer base is located primarily in Ontario with additional clients in other areas of the country.

DIGITAL ENGINEERING

digitalengineering.com ▪ THUNDER BAY, ON

Digital Engineering is a process management technologies firm that assists companies who are looking to increase efficiencies and reduce costs.

We create hardware and software solutions that range from interfaces to move information between process controls and business systems to complete automation projects. We strive to deliver all our products and services in a reliable and cost effective manner that optimizes operational efficiency and maintains safety. Our Energy Solutions include: IESO Dispatch Message Automation, Coincidental Peak Load Control for minimizing Global Adjustment Charges, IESO Operational Metering and Remote Telemetry, Facility and Enterprise Metering Solutions for Electricity, Gas & Water. Our Automation Solutions include: Product design engineering, SCADA system design and implementation, PLC system design, construction and programming, Process Controls and Instrumentation, Industrial Networking.

What makes Digital Engineering unique is our collaborative approach to problem solving, our design and manufacturing capability and our long-term commitment to the customer.

EXPEDITION HELICOPTERS INC.

expeditionhelicopters.com ▪ COCHRANE, ON

The Expedition Group of Companies consists of three reputable divisions that combine all essential services that our clients seek when planning their projects. All create a “one stop shop” for our clients.

Expedition Helicopters has been an industry leader for over 15 years, and attributes much of its success to our excellent working relationships with both the mining organizations and First Nations communities. We proudly boast a large roster of skilled and well trained pilots, as well as one of the largest and most diversified helicopter fleets in Ontario.

With the growth in mining apparent and the lack of service providers in the market place available, Expedition set out to develop a logistical team and infrastructure to provide remote camp facilities, workforce housing and catering services in a cost effective and efficient manner.

Expedition Freight Solutions is the latest division to our Group of Companies which services a large number of important industries and transports freight including forestry products, building materials, steel products, mining equipment, agricultural equipment, modular buildings, and goods. Expedition Freight Solutions is specialized in the transportation of hazardous material and over dimensional loads.

Hearst Air Service Ltd

HEARST AIR SERVICE LTD.

hearstair.com ▪ THUNDER BAY, ON

Hearst Air Service has been operating in the most remote parts of Ontario for over 35 years. We've grown our fleet of 4 aircraft to accommodate the needs of remote exploration camps north of Hearst. We operate turbo otter, turbo beaver, Cessna Caravan and a trusty old piston beaver. Our air base is situated directly off of Highway 11 North, 16 miles west of Hearst, Ontario. Hearst is a lively community. The expertise in repairs, equipment, supplies, service, groceries in the town of Hearst and region have proven to be an important asset to exploration projects in the North. Everthing that you will need in camp to help with the logistics and success of your project is at our fingertips. We have the ability to store equipment and keep a running inventory of supplies. We also have loading and unloading capabilities for the a/c when handling large equipment. Our site is secure and a good distance from neighbours. Locked containers are also available on-site. Bulk drummed fuel orders. Coordinating shipments for staff and equipment via courier, bus, postal service, regional suppliers is available 7 days a week.

For efficient crew changes, we offer flights direct to any major airport to connect with scheduled flights or a SHUTTLE SERVICE to and from Timmins, Kapuskasing, Thunder Bay. Think of travel times, extra hours, accommodation charges and hassles on the road, all avoided with simple, direct and efficient crew changes for drill crews, pilots, cooks and VIPs. Any and all services offered by Hearst Air can be customized to best suit your situations. We are experienced in dealing with the logistics of running and supporting productive projects. We look forward in sharing our expertise with you. NEVER HESITATE TO ASK FOR WHAT IS NEEDED.

KBM RESOURCES GROUP

kbmrg.com • THUNDER BAY, ON

KBM Resources Group is a full-service consulting firm with satellite offices in Saskatchewan and southern Ontario. KBM has a 40-year history of providing practical innovation, and technical and policy solutions to resource-based industries. KBM encompasses a unique blend of professional, technical and vocational talent that effectively brings new ideas from the conceptual stage through to implementation. Many staff have advanced degrees in natural sciences and forestry and academic background. In addition, KBM has an extensive national network of professionals that work on projects through sub-contractual arrangements giving the firm exceptional capacity to respond quickly to client needs. KBM not only captures aerial survey data, but also provides services and products that easily integrate into existing geospatial systems. By turning spatial data into information, KBM can help maximize the power of the data to inform and support clients' decisions. KBM has the expertise to acquire, analyze, visualize and communicate the spatial information required for environmental and feasibility studies, mineral exploration, site planning and monitoring.

LYNX TECHNOLOGIES

lynxtechnologies.ca • CALLANDER, ON

Lynxx Technologies is a technology development company. Our present focus is on the development of a mobile hydraulic platform. The Lynxx LX III, our third prototype, is a highly flexible unit that is intended to reduce mining industry dependence on the expensive use of helicopters.

The LX III can be used to haul personnel, drilling supplies/equipment, and fuel. It is modular and can be flown disassembled on an Otter aircraft to remote locations, and assembled on site by local personnel. It has a payload of 4000 pounds, exerts a ground pressure of less than 1 pound/square inch, and is amphibious. Fully loaded, it will climb a 30 degree slope. Alternatively, when equipped with a plow, it can be used to plow or build ice roads and to support various transportation and logistics requirements in the far North. All control is accomplished through a single electronic programmable joystick, while our proprietary drive system and cleat design provide unprecedented tractive effort.

Accessories, presently under development, include a Magnum crane with a 2000 pound capacity as well as a light weight drill. When properly configured, the Lynxx can power the drill, or it can be used to transport the drill between locations.

PNEUMA TOOLS

pneuma-tool.com • NORTH BAY, ON

Pneuma-Tool's patented, inherently biodegradable rock drill lubricants provide superior lubrication protection to all mining equipment in temperature extremes from -50°C to +65°C, while minimally impacting environmentally sensitive landscapes. They are minimum quantity lubricants, meaning that they can be used at injection rates as low as 20% compared to conventional lubricants - less product to transport and store in remote sites. Water quality is not an issue either, as Pneuma-Tool's polar formulas provide a tenacious barrier to water penetration, ensuring that corrosion problems are minimized. Equipment reliability, and extended service intervals means less downtime for repairs. Wear rates are significantly reduced. Pneuma-Tool lubricants have been proven to solve most of the problems associated with air-tool lubrication, by increasing tool service intervals, minimizing tool freeze-up, and resistance to wash out by water in compressed air. Oil fog is reduced or eliminated. Pneuma-Tool protects the health of miners' lungs, reduces slip / fall hazards, improves visibility so that miners can work more productively, reduces ventilation requirements, and improves miners' cleanliness and hygiene. Pneuma-Tool is proven to minimize oil fog at temperatures as high as 65°C.

PORCUPINE CANVAS

porcupinecanvas.com - SCHUMACHER, ON

Having been in the industrial sewing business for over 30 years, Porcupine Canvas now produces a wide variety of finished products used by prospectors and miners alike.

We produce a complete line of wall tents; prospector style, internal frame style as well as an insulated version to keep toasty in extreme weather conditions. Along with our heavy-duty aluminum framing system, it allows for complete camp construction with ease of portability and set-up.

Porcupine Canvas also produces a large variety of bags and cases used throughout the industry. Priding ourselves on providing innovative solutions to our clients' needs has allowed us to broaden our market to a global one and move forward with a distribution system.

ROCK-TECH

rock-tech.net - LIVELY, ON

Rock-Tech is a Canadian manufacturer of equipment engineered specifically for underground mining applications. We offer a comprehensive range of models in each of our product lines: utility support vehicles, stationary rockbreaking systems and fuel/oil/grease handling/storage products. Our program includes: comprehensive parts management program, trained field service technicians, certified rebuild programs, service programs, operator and mechanical training programs, and equipment audit programs.

We are focused on ensuring that our customers' sustainability and viability is assisted by our commitment to: continually pursue new technologies and improvements through investment, research and engineering innovation; establish long-term partnerships with our customers by developing products that offer innovative and collaborative solutions that add value and efficiencies to their operations; continually strive to improve our health, safety and environment practices within our operations for our employees, customers, suppliers and community.

Over the years we have worked closely to create mining-specific products for a wide range of mining companies including Vale, Xstrata, De Beers, Diavik Diamond Mine, Goldcorp, Agnico Eagle, Barrick Gold, BHP Billiton, and IAMGOLD.

THE S.A.F.E. CO.

store-anything-fast-easy.com - SUDBURY, ON

The S.A.F.E. Co. is not a "one container fits all" company. We recognize that everyone's storage needs are unique. Whether you require portable on demand storage, flexible self storage or need to own a long term solution we can accommodate you. Whether you are moving, renovating, or just need more space the S.A.F.E. Company's flexible quick-build containers, in a variety of sizes, can be configured to fit your needs.

Storage can be delivered directly to your site. Units can be delivered, setup, ready to use, or flat-packed and assembled on site in under 5 minutes without tools. Rent or own, large or small, we have a solution that will work for you.

Offering: portable storage rentals and sales - self-storage rentals - secure storage for business or home - mining and oil field applications - chemical containment - construction sites - emergency and disaster relief - military - exploration.

HAILEYBURY SCHOOL OF MINES ALUMNI ASSOCIATION

northernnc.on.ca ▪ NEW LISKEARD, ON

The Haileybury School of Mines Alumni Association was formed in 1959 when, at that time, the former Provincial Institute of Mining had reached graduates numbering approximately six hundred. The purpose of establishing the association, as is with most school alumni groups, was to provide a means for former graduates to stay in touch with each other and the school. Graduate numbers since the school began in 1912, are now nearing 3,000. The HSMAA is a strong body, some claiming it to be one of the strongest school alumni associations in the country. The excellent camaraderie among its members unifies the group with the common purpose of support to its former institution and its colleagues. To belong to the HSM alumni is to be part of a brotherhood spanning the world.

NOTES

ICAMP

canadorecollege.ca/icamp ▪ NORTH BAY, ON

The Innovation Centre for Advanced Manufacturing and Production (ICAMP) opened its doors in September 2013. It provides the necessary resources for companies to research and create new products without any heavy investment in specific technologies. This 8,500 square foot industrial centre is focused on product innovation allowing companies to access the technologies and resources for the development of new products and processes or the refining of existing products and processes.

How it works - a simplified approach

A company can enter or exit ICAMP at any step. ICAMP provides technology for: product design tools, rapid prototype development, reverse engineering, 3D printing, material and product testing, advanced manufacturing machining, process design and automation, simulation.

How ICAMP can help:

Enables access to funding for new technologies, enables experimentation and development of new products and processes or the refinement of existing products and processes, provides a central site that protects an individual company's intellectual property, leverages existing infrastructure (shops and labs) to provide businesses with the support required during the development, incubation, expansion or re-tooling phases, focused on commercialization.

LAC SEUL TRAINING CENTRE OF EXCELLENCE

lstce.ca ▪ HUDSON, ON

Adam McCarty
adamccarty@lsfn.ca
807.582.0386

The mission of the Lac Seul Training Centre of Excellence (LSTCE) is to build capacity in Aboriginal and Northern communities by training, certifying, and preparing individuals for employment in the Mining, Forestry, Hospitality and Resource sectors, and linking them to careers throughout the region and beyond.

Based in Hudson, ON, approximately 20km from Sioux Lookout, the LSTCE is owned and operated as a not-for-profit organization by Lac Seul First Nation. Our facility contains 3 large classrooms equipped with Smartboards, a computer lab, and a full kitchen made available to students that often host social and traditional lunches.

To date, the LSTCE has offered programs in areas such as Adult Education, Beginner Driver Education, First Aid & CPR, Surface Miner Common Core, Seasonal Guiding, Essential Skills, and Surface Diamond Drilling, with many more programs in a variety of areas upcoming, including a School of Culinary Arts!

Programs at the LSTCE are open to anyone and everyone, with a specific focus on Aboriginal training and employment. Camp-style accommodations and a meal plan are available for visiting students, and courses run throughout the year.

MAJIC - MATERIAL JOINING INNOVATION CENTRE

majic-ca.org ▪ KIRKLAND LAKE, ON

Evan Butler-Jones
evan.butler-jones@majic-ca.org
705.567.6411

The Materials Joining Innovation Centre (MaJIC) is a not-for-profit organization created to fill industry's need for practical welding expertise. MaJIC plays a vital role in Canada's leading industry sectors by helping companies to enhance productivity and quality, meet regulatory requirements, and improve safety.

MaJIC provides a range of practical services direct to industry, combining technical expertise with state-of-the-art laboratory facilities. Services include welding engineering, applied research & development, material analysis and testing, welder qualification, training, and more.

NORTHERN COLLEGE / HAILEYBURY SCHOOL OF MINES

northern.on.ca ▪ TIMMINS/HAILEYBURY/KIRKLAND LAKE, ON

Northern College offers over 75 full and part-time post-secondary programs in Schools of Business and Office Administration, Community Services, Engineering Technology and Trades, Health Sciences and Emergency Services, Veterinary Sciences and Welding Engineering Technology. Northern has campuses in Haileybury, Kirkland Lake, Moosonee and Timmins.

Northern College is home to the world-renowned Haileybury School of Mines, an institution that has set the standard for mining education in Canada and throughout the world. With over 100 years of experience backing it, the Haileybury School of Mines Mining Engineering Technician program has continuously evolved to meet industry need. Demand for this program has proven so high that it is now also delivered at partner colleges in Ontario and Saskatchewan.

Northern College's Apprenticeship, Community and Corporate Training Centre (ACCT) offers customized, accessible training solutions designed to meet the needs of business and industry. ACCT develops and delivers courses, programs and services with one goal in mind – achieving maximum workforce performance for clients. Northern College can help grow a client organization through workforce development, and help build capacity to meet operational objectives.

TOWNSHIP OF JAMES / ELK LAKE

elklake.ca ▪ NORTHEASTERN ONTARIO

The historic resource community of Elk Lake was founded in 1906 with the discovery of silver by the legendary Jack Munroe. In addition to its own mines, it became a primary supply point for Matachewan, Gowganda and beyond to Shiningtree during their heyday as mining camps. Elk Lake then transitioned into a lumbering centre which it remains to this day. In true industry fashion with the rebirth of Matachewan, it has also again become a supplier of services to the mining industry both near and far through resident businesses supplying industrial maintenance requirements. Elk Lake also features a fully serviced industrial park for locating your business or industry in. Situated on the banks of the Montreal River where the Bear Creek enters it, this picturesque community is recognized for its welcoming nature.

THE TOWN OF KAPUSKASING

kapuskasing.ca ▪ NORTHEASTERN ONTARIO

Kapuskasing is Open for Business. Strategically located in Northern Ontario, Kapuskasing is a hub of economic activity on the Trans-Canada Highway. The town is the service centre for several large resource development projects. It is also a centre for the mining supply and service sector. With direct rail access to the east, west and south, as well as daily scheduled air service, Kapuskasing is a sought after community in which to do business.

Bring your business to the Kapuskasing Airport. The airport is situated on Trans-Canada Highway 11 and adjacent to rail freight service. It offers many amenities such as fueling services, hangar space and a 5,500 foot runway. A multi-million dollar airport improvement project was recently completed to accommodate the increased activity in the resource sector. Airport industrial land is available to suit your business needs. Bring your business to the Kapuskasing Airport and take advantage of the northern opportunities.

The NWCFCDC Network is comprised of nine Community Futures Development Corporations located across Northwestern Ontario. CFDC's are non-profit corporations, governed by local volunteer board of directors with a mandate of improving the communities they serve through business development. CFDC's can provide assistance with small business development, access to capital, community strategic planning and relevant small business training solutions. The CFDC's are your local business, community & economic development experts.

THE CITY OF TEMISKAMING SHORES

temiskamingshores.ca ▪ NORTHEASTERN ONTARIO

In January 2004, the communities of Haileybury, New Liskeard and Dymond amalgamated to become the City of Temiskaming Shores. The community of 10,500 is the economic and service hub for a population of approximately 33,000 from both Ontario and Quebec. The City is central within the region located between North Bay, Sudbury, Timmins and Rouyn, QC. Our businesses service the mining, forestry and agricultural industries.

James Franks
jfranks@temiskamingshores.ca
705.672.2733 x 4137

The community is located at the head of Lake Temiskaming which flows south into the Ottawa River. There are many cultural events and activities which make the lifestyle of the community second to none. The labour force is reasonably well skilled and with several post-secondary education and training facilities in the City, there are many options for labour skills development.

TOWN OF ATIKOKAN

atikokan.ca ▪ NORTHWESTERN ONTARIO

Garry McKinnon

garry.mckinnon@atikokaninfo.com

807.597.2757

Atikokan is the host community for Osisko's Hammond Reef gold camp. Our proximity to the Red Lake, Musselwhite, Lac des Isles, Treasury Metals, and New Gold/Rainy River camps makes Atikokan a prime strategic location for mining sector support services. The Town of Atikokan and the Atikokan Economic Development Corporation look forward to making our resources available to help your business locate in our community.

CITY OF KENORA

kenora.ca ▪ NORTHWESTERN ONTARIO

Jennifer Findlay

jfindlay@kenora.ca

807.467.2127

Welcome to Kenora! The City of Kenora is a mining services centre for exploration companies and has serviced industrial land for mining and mineral processing. Kenora is located just 200km east of Winnipeg, Manitoba on the world famous Lake of the Woods. Kenora is located right on the Trans-Canada highway, with strong transportation linkages. We have the land, the labour force, the mining-related professional services, and the amenities you need to stage your operations from hotels to restaurants to cooks and caterers. Our office will provide you with an overview of the current mining related and other development projects in the area, introduce you to the local business community, municipal and other government officials and approval agencies, assist you to identify the right location for your operation and help you access any available funding for your project. Kenora is a community on the move. We want your business to help us aggressively pursue our goal of job creation in the mining services sector.

THE MUNICIPALITY OF WEST NIPISSING

westnipissing.ca ▪ NORTHEASTERN ONTARIO

West Nipissing Ovest

Stephan Poulin

spoulin@westnipissing.ca

705.753.6902

Live, work and relax in a place most people only dream of... West Nipissing is not just a great place to live in, but an IDEAL BUSINESS LOCATION. Nestled between the cities of Sudbury and North Bay, we are merely 400 km from major centres such as Ottawa and Toronto. Close proximity to major markets, a skilled labour pool and a favorable business climate makes West Nipissing an ideal location for new investment projects. Investment opportunities exist in many sectors ranging from bioenergy, mining equipment and services, forestry, business process outsourcing, agriculture and advanced manufacturing.

NORTHERN ONTARIO
