## Packaging Engineer

### Who Are We?

FoodPro Manufacturing are one of the largest frozen food ready meal manufacturers in the UK , over 30 years of trading has allowed us to grow within our industry and remain sustainable by being a part of the Browns Food Group.

See our website on <https://www.foodpro.co.uk/>

### Our Culture:

Here at FoodPro we pride ourselves on supporting our team to achieve their career goals. We do this by providing a working environment based on the company values of Honesty, Environment, Action Responsibility, Team (HEART).

### Why join FoodPro?

FoodPro retains its 'family core values' at the heart of everything we do, alongside these values; we consistently continue to invest in our people and our processes

The business has recently expanded its production facilities resulting in the need to expand our current work force.

### What key ingredients are we looking for?

Firstly, a "can do attitude ", a good work ethic, punctuality and lastly a want to be a part of something great!

### What is a typical day like?

Working in the food industry as an Engineer, you will be required to carry out both preventative and reactive maintenance duties in addition to completing daily job sheets. Working alongside a well-trained production workforce, allows a great opportunity to share process improvements and best practices.

Salary is dependent on experience. Shifts will be on a rotating basis and flexibility in finishing times is key to ensure production downtime is minimised.

If you are a self-driven individual with a "can to attitude" and are someone who wants to make a difference – please apply. We shall look forward to speaking to you ...

Job Type: Full-time/part time
