

Cable & Harness Capabilities

- Military & Aerospace cables
- Ruggedised connector technology
- Power Cords
- Wire Processing and Termination
- Prototype and pre-production evaluation
- Wire from 36 AWG
- Low outgas vacuum cables
- RF Cable Assemblies
- Hermetically sealed products
- Multicore cables and mil-spec wires
- In-house test facilities
- Stringent quality control
- Connectors from 0.5mm pitch
- WHMA A-620 certified engineers

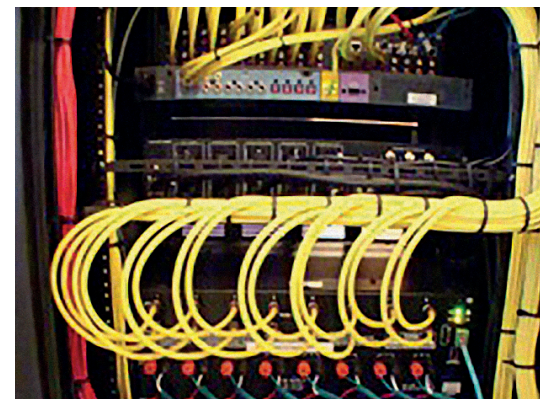

Military & Aerospace Cable Assemblies

Using ruggedised connector technology, from mil-circular connectors to the latest blind mate interconnections, we manufacture high quality custom military and aerospace cable assemblies. For in-the-box requirements we offer laced and loomed assemblies, and for external cables we provide hermetically sealed products, ensuring optimum performance in the harshest of environments.

Simple Cable Assemblies

Simple cable assemblies include external cabling, internal wiring and ribbon cables.

Technologies include multicore cable, ribbon cable or discrete wires incorporating simple prepared wire terminations to military specification connectors.
