

RACE TRAILERS

BUILT FOR THE LONG HAUL

MEETING THE NEEDS OF RACERS FOR OVER 30 YEARS

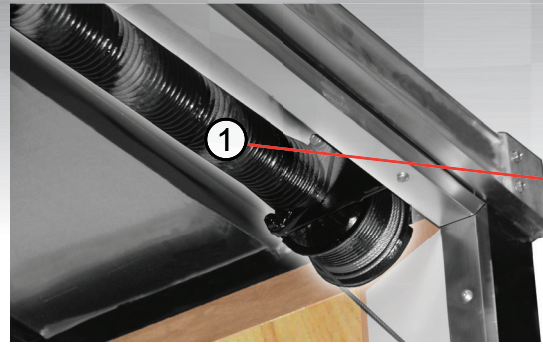

United Trailers has built over 170,000 trailers to our customers satisfaction.

Our knowledgeable dealers use their years of experience to your advantage by working with you to custom design and build the trailer that is right for you.

United Trailers has researched and worked with race team members to learn the best ways to build race trailers. This research pays off in a better product for you, and has helped us develop a variety of products and an extensive list of options to meet your needs for today and tomorrow.

You can count on your United Trailers dealer to work with you every step of the way to help design and build a trailer that fits your needs and your budget. That's our promise to you.

① Raising and lowering the ramp door is easy with the powerful torsion spring assist.

⑬ 14 gauge steel strapping is used for diagonal bracing on trailers with at least 3' of extra height.

⑮ 14 gauge steel top rails are used to frame a stronger, straighter roof line.

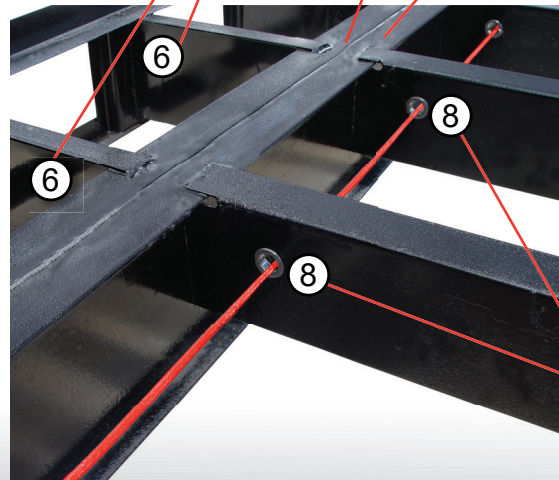

The rear corner posts and header are made of 12 gauge steel to give the ramp door a solid framework.

Trailer-rated radial tires and torsion axles provide maximum performance and safety.

Rubber torsion axles with E-Z Lube Hubs® are standard. All models come standard with electric brakes.

Double "1" beam is run front to back on units with 6000 lb. axles and up for added strength, with the exception of a beavertail.

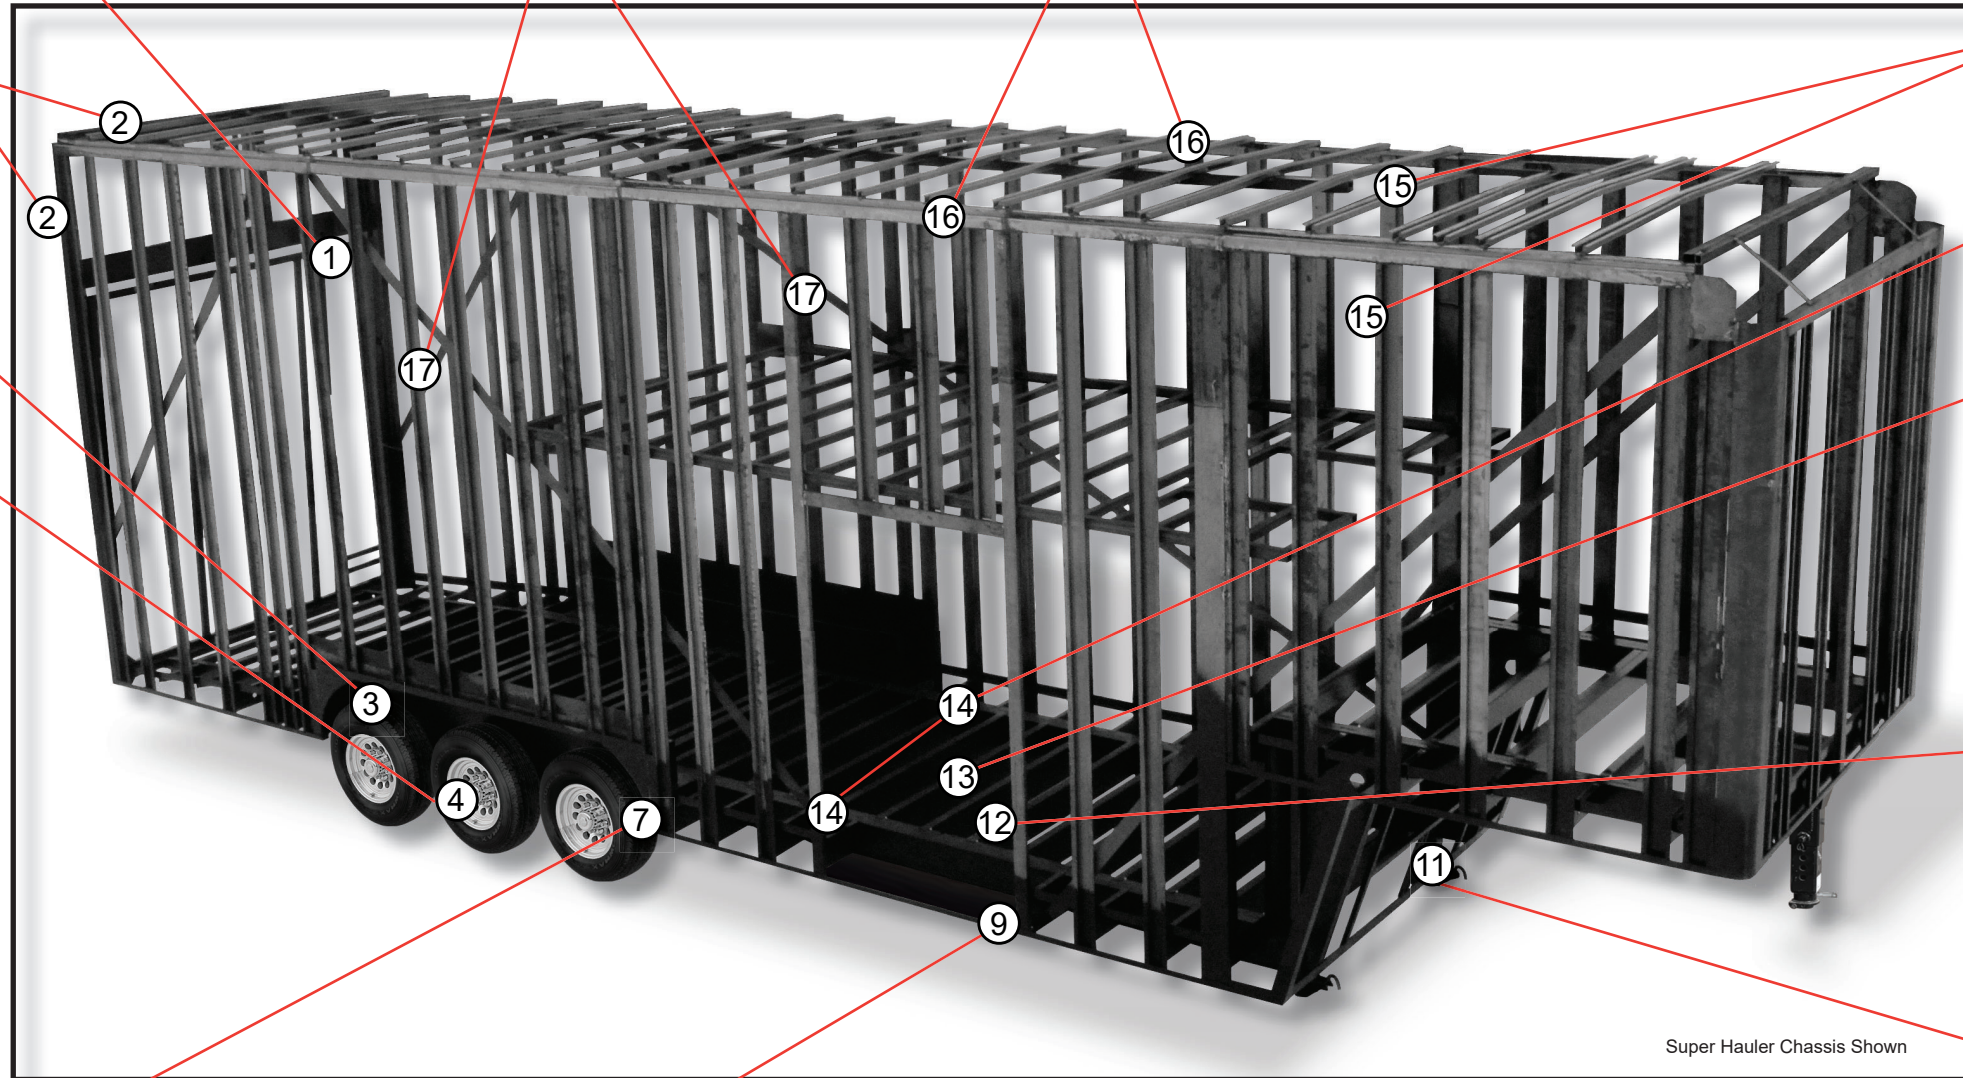

Heavy-duty steel square outriggers are welded to the outer wall for added stability and strength.

⑧ Grommets are used where the wires pass through the steel to prevent electrical shorts.

⑦ Extra framework is added to the front and rear of each wheel area, as necessary, to provide added strength for the wall.

⑨ The lower section of every trailer frame is sprayed with a special protective undercoating.

⑮ 16 gauge steel roof bows and 16 gauge steel wall hat posts provide solid upright support. (Shown with 14 gauge Nascar style hat posts, which is required on 36" extra height and over)

⑭ Two heavy-duty steel I-beams provide a solid foundation for your trailer.

⑬ 13 gauge steel cross-members run between the I-beams to support the floor. 16" spacing is standard with 12" spacing as an option. Trailers built with 6" I-beams use 5-1/2" crossmembers and trailers built with 8" I-beams use 7-1/2" crossmembers. Matching crossmembers to the I-beam helps maintain structural rigidity.

⑫ All walk-in door framing is 1" x 3" rectangular channel for a straighter perimeter.

⑪ 2-speed bolt-on drop leg jacks are standard on goosenecks with a hydraulic jack as an option for effort free leveling.

Super Hauler Chassis Shown

⑩ On "tag" units, a 6" tubular steel tongue is standard. Trailers with 8,000 lb. axles are standard with 1/4" wall tube. A third member is added for any of the following conditions:

- Trailers with a GVWR of 7,000 lbs. or more
- Trailers with an extended tongue
- Trailers with a pintle eye coupler
- Trailers with tandem axles

Note: 8' wide models are approximately 93-1/4" wide and the 8.5' wide models are approximately 100" wide.
 * On trailers 14' and shorter, the "beavertail" is not available!
 ** On trailers with 6" I-Beam, there will be 2" additional interior height.

4 POST HYDRAULIC LIFT SYSTEM

Shown is a 46' unit with 54" of extra height and the optional Car Platform.

With the **4 Post Hydraulic Lift System**, the width between the wheel wells limits the maximum car width to 81". *Maximum width between wheel wells on trailers with 8000lb. axles is 80". Clearance below lift at maximum height is 80" Tall. The hydraulics are operated by a 12 volt deep cycle battery, so AC power is not required to raise and/or lower the vehicle at all times. The number of times that the lift may be operated on battery power depends on the type of battery, the weight of the vehicle and the current charge of the battery.

4-Post Titan Lift Systems are a popular option for United stacker trailers. They are available in 13ft, 14ft, and 16ft lengths and are Gun Metal in color. Each lift has a 6,000lb. maximum capacity. (Left) shows a lift in the down position with removable lift ramps stored in pockets mounted to the sidewalls. (Just below) shows the removable lift ramps installed. (Bottom Right) shows a lift in the up position.

CUSTOMIZATION IS OUR SPECIALTY

Triple Spread Axles Shown

Tandem Super Spread Axles Shown

Below shows one of our popular cabinet configurations with a 1/2 closet and "L" base cabinet which can house a winch to assist in loading and unloading your vehicles. The overhead cabinets are upgraded to 32" tall with a centered shelf. (Black cabinets w/ mill finish countertop)

Left and Upper Left are optional triple spread and tandem super spread axles to help support those larger loads.

Below is a Deluxe Straight Cabinet Package on the RS wall with a 3-drawer base upgrade. There is a removable ladder on the riser wall for easier access to the bunk area. (Black cabinets w/ mill finish countertop)

POPULAR OPTIONS AND PACKAGES AVAILABLE

Super Hauler shown with 8500 series manual awning, RV Door, window in bunk, and spread axles. Other options may be shown.

United Trailers makes it easy to purchase the right trailer with the right options for your budget. We provide hundreds of available options and get pre-packaged options for a great value to ensure you have exactly what you need in your trailer.

RACERS' PACKAGE

- Generator door (36" x 30")
- Standard or deluxe aluminum cabinet pkg
- 4 - Heavy duty recessed D-rings
- 3 - Fluorescent lights (4' or 8')
- 1 - Set 3-way switches
- 4 - 110-volt duplex inside recepts
- 1 - 110-volt exterior GFI recept
- Carbon Monoxide Detector
- 50 amp electric panel w/ lifeline & hatch

RACERS' PACKAGE 12 Volt

- Generator door (36" x 30")
- Standard or deluxe aluminum cabinet pkg
- 4 - Heavy duty recessed D-rings
- 3 - 18" 12V LED Interior Lights
- 1 - Set 3-way switches
- 4 - 110-volt duplex inside recepts
- 1 - 110-volt exterior GFI recept
- Carbon Monoxide Detector
- 50 amp electric panel w/ lifeline & hatch
- 110V to 12V 55 amp converter
- 12V battery w/ recessed battery box

Racer Special PACKAGE

- 48" Side door with barlock
- Ramp door with spring assist
- Beavertail
- Flat front with bright aluminum on wrap from front to roof
- Insulated white vinyl ceiling

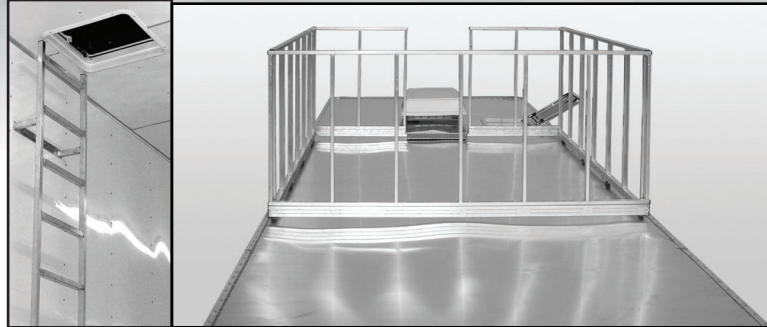

FINISH LINE PACKAGE

- 48" Side door with Barlock and RV door lock
- Ramp door with spring assist
- On units 16' and longer, a "beavertail" is included for easy loading
- Bright aluminum rear hoop (rear corners & header) on rear door framing
- 2 - 12-volt LED loading lights with switch
- 4 - Heavy duty recessed D-rings
- 1 - Non-powered roof vent
- White vinyl ceiling

UXT With Finish Line Package

RACE TRAILER OPTIONS

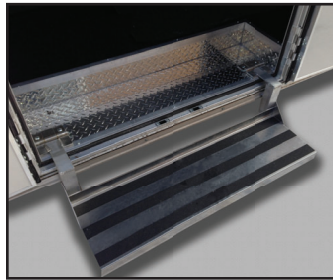

With an inside ladder, roof hatch, and observation deck*, you can get a bird's eye view of the racing activities. The roof hatch w/ ladder and observation deck are separate options.

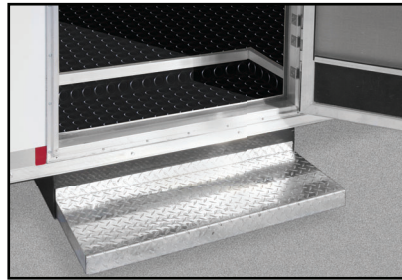

Recessed cam locks provide a strong hold to the ramp door with a flush design.

Stay organized with an optional stainless steel tool box.

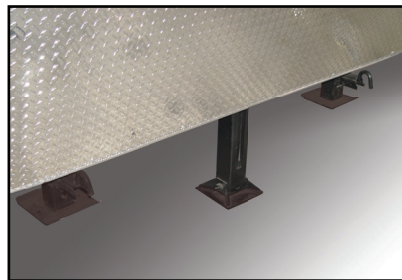

Fold down step

Slide out step

Get a jump door to make a quick getaway after loading your car.

The hydraulic jack is recommended for your race trailer. It is faster, easier and made for heavy use.

Keeping the generator in a separate compartment helps keep it quiet and is handy when it comes to maintenance and repairs. Optional 400 series door (right) with flush rv style lock also available.

RACE TRAILER OPTIONS

Generator Box Mounted on Front Bunk

Bard A/C Mounted on Front Bunk
(picture shows Bard unit covered with optional white aluminum)

Custom lighting configurations are available on all of our race trailers. You can add extra tail lights, docking lights, additional clearance lights, 12V LED loading lights, and recessed or swing-out Quartz lights to name a few.

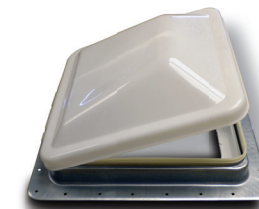

Roof Mounted Air Conditioning *

Work in comfort with a roof mounted air conditioning and heating unit.

Interior View of Roof Mounted A/C

Non-powered roof vent

Vent covers allow the roof vent to remain open in the rain and while traveling.

Roof Vents*

Choose from:

1. Non-powered (no fan)
2. 12-volt DC powered fan
3. 110-volt AC powered fan

* Due to maximum height limitations, units with 48" to 54" extra height may not be able to have an observation deck or roof mounted equipment installed.

ACCESSORIES FOR SPRINT CAR TRAILERS

A Sunchaser 9100 series awning allows an automatic dump of water with the built in gas shocks so you can spend more time playing and less time worrying about your awning.

Ramps over the wheel wells and 2" corner posts allow you to carry vehicles with an outside-to-outside dimension of up to 96" wide.

Tray and Wing Hangers

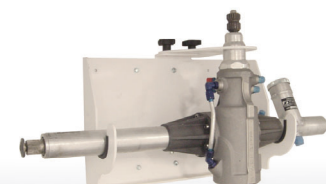

Nose Wing Brackets

Axle Racks

Header Brackets

Steering Gear Mount

Many more options available! Please see your United Trailers dealer for details.

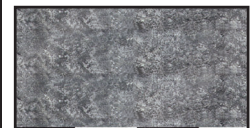

RACE TRAILER OPTIONS

RACE TRAILER OPTIONS

In a Hurry for Your Trailer? We have a HUGE six bay options building to serve you faster!

FLOORING OPTIONS

Marble-look Vinyl

Classy and clean looking, this is an easy to maintain floor.

Black And White Vinyl

Sporty, durable and attractive, this is a favorite among motorsports buffs.

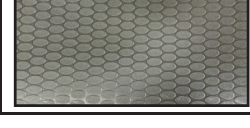

Aluminum Tread Plate

You can't beat this for a heavy-duty and good looking floor that stands up to the toughest punishment.

.080 Smooth Aluminum

Great for a clean looking, yet tough and durable floor.

Black Raised Coin

Perfect combination of durability, safety, and value.

Easily access the upper deck with a notch in the platform with an angled removable ladder from the main floor to the bunk at the riser wall.

In-Floor Spare Tire Well

Folding ladder in open position. When not in use, ladder folds flat against wall.

Add an optional 12V jack to your trailer to have effortless leveling and hookup to your truck. The electric jack is available in a 3500 lb. rating while a 6000 lb. hydraulic jack is also available.

POPULAR LIGHTING OPTIONS

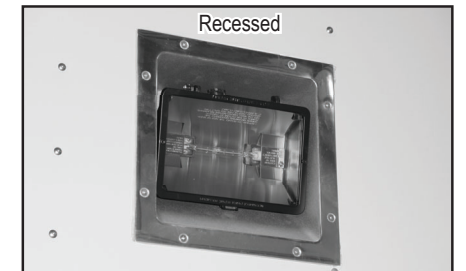

12V Scene Lights provide emergency vehicle grade lighting without the need for shore power.

Folds Back and Swings Out

Swing out Quartz lights allow powerful exterior lighting.

Recessed Quartz lights can be added to the rear or sides of the trailer.

Angled Docking Lights

LED Mid Ship Turn Signal

12V LED loading lights provide good lighting while only being connected to your vehicle or having an on-board battery.

A 52" 12V Flood Light provides the maximum amount of light to the rear loading area.

14" Angled Scene Light

Interior & exterior LED lighting is available in 110V and 12V power supplies.

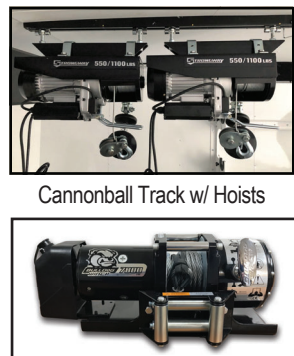

18" 12V LED Interior Lights

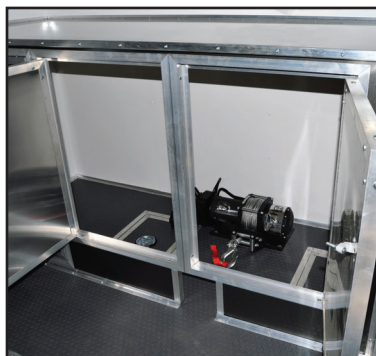

Air Reel

Electric Reel

Winch

Winch in Cabinet

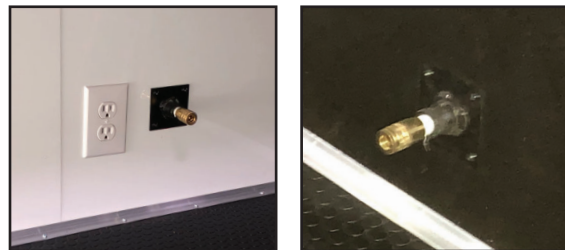

Cannonball Track w/ Hoists

RACE TRAILER OPTIONS

Be ready for action with your custom cabinets, tire racks, and air lines!

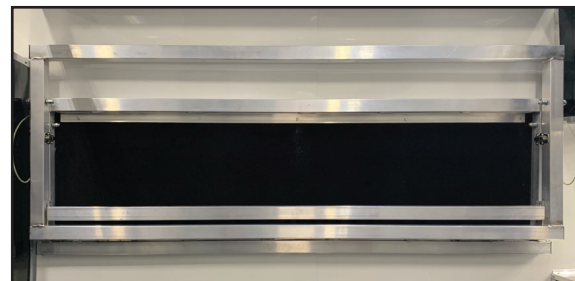

Several standard cabinet layout options are available and custom layouts are available, if required. Our skilled craftsmen have years of experience building customized cabinets for the racing industry. In addition to cabinets in the front of the trailer, another popular option is for cabinets to be installed over the wheel wells, to help maximize space utilization.

Wall-Mounted Air Line Connectors

Stationary Tire Racks

Fold Up Tire Rack

Tire Cabinet

Many more options available! Please see your United Trailers dealer for details.

SECURE YOUR CARGO

Heavy Duty D-Ring

Light Duty Tie-Down

E-Track

With our popular E-track mounted in the floor and walls, you have extreme flexibility and peace of mind when securing your cargo.

E-Track Clip-In Straps

These attach to the E-Track for the attachment of tie-down straps.
