DECISIONS SUITE & DECISIONSXPRESS SUITE

Comprehensive Solutions Make the Choice Easy

Decisions Suite and DecisionsXPress Suite deliver rating bureau support for commercial lines and management of custom deviations. Both integrated systems include flexible, comprehensive policy, billing and claims solutions for insurers, MGAs, niche providers and start-ups.

The integration of core processing and customer-facing initiatives in both systems support the complexities and nuances of policy, billing and claims operations. The systems are continually updated and enhanced seamlessly and non-disruptively, keeping the technology future-proof. Both the Decisions Suite and DecisionsXPress Suite let insurance organizations stay competitive.

With each suite, clients gain an all-in-one comprehensive, flexible system that delivers rich content and deep functionality for all types of insurance, including multiple types of users and roles throughout distribution channels. Key features include:

Tools-Driven Web Architecture. Users can take line of business support and configure it into programs and products as needed.

Data & Analytics Infusion. Insurity content specialists handle the complex task of monitoring, analyzing, interpreting and integrating bureau content into the system, including exceptions and unique implementations that clients may require.

User/Role Centricity & User Experience Flexibility. Regardless of the type of user, the suites offer complete flexibility when it comes to functions and data views. Users can define what they most need to see in the system to support their workflows.

Enhanced Value. Decisions Suite supports experiences within the application and can extend these services to other areas, such as rating, rules and functions.

DecisionsXPress

DecisionsXPress Suite is an advanced, full-featured system that offers a lighter implementation effort and the flexibility required to customize the data capture and workflow modules.

Built into DecisionsXPress Suite are Insurity's SmartTools, billing and reporting functions.

SmartTools

Screen-based SmartTools let users define and build any insurance product or line of business, without programming or scripting. Decisions Suite and DecisionsXPress Suite minimize external support costs while increasing speed to market and providing flexibility to drive innovation.

Streamline Your Billing and Claims

Decisions Suite and DecisionsXPress Suite support varying complexities and volumes of claims for commercial lines, workers' compensation and custom lines. The suites also offer scalable billing that can meet the needs of all size organizations, from start-ups to Tier 1 insurers. Additional features of the suites include:

Streamlined processes. Pre-integrated policy and claims systems or a full combination lets Insurity clients meet their unique needs while making it easy on all users.

Exceptional user experience. Agents, insureds, service providers and claimants gain an exceptional experience through innovative, app-oriented design, intuitive self-service loss/injury reporting and claim status, as well as automated claim routing.

Intuitive, configurable functions. The systems are customizable without the need for coding or additional programming.

Improved transparency. User-friendly dashboards and reporting options provide easy access to processes, increasing transparency.

Easy intake. The systems make claims intake and administration simple, with First Notice of Loss/First Report of Injury, integrated litigation and medical case management, as well as payment and activity monitoring.

Flexible options for billing. The suites accommodate a variety of billing options for insureds, from checks and Electronic Funds Transfer to credit/debit cards and Electronic Bill Presentment and Payment.

Stay Grounded with Insurity's Cloud Leadership

Insurity clients' IT teams spend little or no time on hardware and software installations with our integrated suites. We perform all system maintenance, upgrades and support through the cloud — backed by our 100% uptime guarantee — so you can focus on the decisions that will move your business ahead.
