

name a few.

"We have been producing best quality spare parts for European make weaving machines since the last 30 years. This deep experience and use of high quality raw materials help us to deliver spares of impeccable quality to our customers across the world," Mr. Aakesh Bhongade, Director at TumKalip India Pvt Ltd said.

"The setting up of the wholly owned subsidiary will help us offer the best services possible to our Indian customers. On the strength of the quality of its products, TumKalip believes in striking long-term partnerships and not just one time sales with its clients," Mr. Bhongade added.

Rabatex lines-up impressive weaving preparatory technologies at ITME India

- ◆ High speed Sample Warping Machine suitable for yarn range between 5 to 500 Tex
- ◆ Sectional Warping Machine has user friendly advance software & data management
- ◆ Single End Sizing Machine produces sized yarn of the highest quality
- ◆ Rabatex creels for various applications like glass fibre, geo grid, flat warp & monofilament
- ◆ Battery operated as well as manual material handling & storage equipment

Ahmedabad based Rabatex Industries has lined-up the latest and innovative weaving preparatory technologies including battery operated as well as manual material handling and storage equipment, including accessories like creels for technical textiles applications at the upcoming India ITME exhibition in Hall6, Stall No. H6D8.

Among its various technologies, Rabatex will showcase the High Speed Sample Warper, Sectional Warper Machine, Single End Sizing Machine; Battery operated Warp Beam Carrier with Healdframe support and Cloth Roll Doffer Carrier and also display creels for technical textiles at ITME India.

The Rabatex high speed Sample Warping Machine model RI 6001 is primarily for production of samples and short production warp at very high production rate. The RI 6001 has a robustly constructed warping drum, suitable up to widths

of 2400 mm and for warping lengths between 21 and 450 metres (depending on thread density) and suitable for yarn range from 5 to 500 Tex. The RI 6001 comes with a heavy duty rotational creel with a maximum creel capacity of 16 colours and is suitable of attaining maximum speeds of up to 1,200 metres per minutes.

The Rabatex Sectional Warping Machine RI 112 is a state-of-the-art technology which produces high quality warp beams with higher productivity. The RI 112 comes with user friendly advance software and data management, which offers all online data of warping operations. It also offers graphical display of all events and breakages and also loss end memory control.

The ergonomically designed Single End Sizing Machine RI 8001 offers 4, 8, 12 and 16 spindle configurations and produces sized yarn of the highest quality to ensure trouble-free and smooth weaving operations. The RI-8001 is suitable for cotton yarn in the range of 10's to 120's Ne and polyester yarn in the range of 30 to 210 deniers, with option of dry steam or electric heater drying system.

The Rabatex Battery operated Warp Beam Carrier with Heald frame support VM 5003 is Beam Gaiting Trolley with a robust structure for lifting of beam with harness, dropper and heald frame.

The VM 5003 comes with a battery operated hydraulic power pack unit, transportation module with battery life for continuous working of 8 hours. Lastly, the Rabatex Cloth Roll Doffer Carrier Cradle VM 508 is designed to be compact and suitable for lifting and transporting a cloth roll in narrow gangways. The cloth roll cradle can be lowered up to the ground floor. The cloth roll on the weaving machine can also be directly lifted and transported by the VM 508.

Rabatex also offers technologies for the fast growing technical textiles sector like Polybeamer with unrolling creel
