

# BPA Platform for Sage Data Sheet

## What is it?

BPA Platform enables organisations to build powerful automated business processes while leveraging the power of existing systems.

The product is built around the central concepts of tasks and steps to provide the ability to build ultimately flexible automation processes with logical building blocks. These processes integrate seamlessly with existing information sources, applications, infrastructure and communications without the need for complex programming.

You automate an employee process by dragging and dropping icons onto a canvas and linking them together in a process flow. The correlation of these tools replicate the physical employee process to your exact business rules. However, scripting can be called upon where standard functionality is unable to achieve a given solution.

## What are the tools used to define processes?

The tools are used to create steps within a task, providing the functional building blocks that interface with common technologies, systems and applications.

They are then joined together in a logical sequence to build the business process.

Based on the capabilities purchased, standard tools are listed below:

## Key features

BPA Platform is comprised of four capabilities facilitating businesses to achieve more with the systems they have in place, they include:

- **Notifications & Alerts**

Examples: Aged debtor updates, back orders now in stock, KPI notifications, price changes, order confirmations, delivery notifications.

- **Report & Document Automation**

Examples: Credit control letters, renewal documents, waste reports, pick lists, compliance documents, sales & stock reports, delivery notes.

- **Data Integration & Synchronisation**

Examples: Integrating ERP systems, CRM solutions, eCommerce applications, WMS applications, accounting software, EDI solutions, courier services.

- **Workflow & Human Interaction**

Examples: Purchase order authorisations, credit limit reviews, price change, discount authorisations and expense approvals.

EVENT	INPUT	FORMAT	
Schedule	Query Database (OLEDB)	Format as Text	Merge MS Word
MS SQL Server Trigger	Query Database (ODBC)	Format as HTML	Run Crystal Reports
Oracle Trigger	Call Procedure (OLEDB)	Recordset to XML	Format as Text
SMTP	XML Document Import	XML to Recordset	Create Workflow Job
Workflow Job Submission	Flat File Import	Run MS Reporting Services Report	
OUTPUT	EXECUTE	GENERAL	
Send Email (SMTP)	Call Com Object	Data Filter	
Print Document	Run VB Script	Data Transformation	
Save as File	Call Procedure (OLEDB)	Decision	
Send SMS (M-Science)	Run Program	File Management	
File Transfer (FTP)	Call Task Event	Text Parser	
Call Procedure (OLEDB)			
Send Fax			

# BPA Platform for Sage Data Sheet

## Sage integration connectors

BPA Platform can connect practically any data source via **ODBC, OLEDB, Web Services** or an extensive range of supported **3rd party APIs** through **connectors**. This includes eCommerce, courier services, marketing, warehouse management, payment gateways and SMS services. For a more comprehensive list as well as industry specific solutions please visit [www.codelessplatforms.com](http://www.codelessplatforms.com)

We also provide a number of pre-packaged, 'out-of-the-box' Sage 200 solutions for Amazon, eBay, Magento, Shopify and WooCommerce.

## What system requirements do I need to implement the solution?

BPA Platform is Windows-based software, utilising a true three-tier client server model over TCP/IP, with a multi-threaded server running as a Windows Service. It can run in 32-bit and 64-bit environments, and can communicate with both 32- and 64-bit external systems. The **Client** provides all administrative and Task design capabilities, while the **Server** provides the client connectivity and manages the processing of Tasks.

### Supported Sage solutions

Sage 200                      Sage 1000  
Sage Enterprise ERP      Sage Line 500  
(formerly Sage X3)

### BPA Platform

The following indicates the supported operating systems and minimum service pack required:

Microsoft Windows 2008 Server 32 bit / 64 bit / R2  
Microsoft Windows 2012 Server / R2  
Microsoft Windows 2016 Server 64-bit

### BPA Platform hardware (Min)

Dual 2Ghz processor cores  
4 GB of available memory  
1.5 GB available disk space  
1280x800 desktop
