The Latest Way to Cool Your Home with the Power of the Sun!

Compare the features and benefits of the **SkyFlex Solar Fan** for yourself.

Other Brands	SKY FLEX Solar Fans
WARRANTY	
Minimal coverage, oftentimes 5-10 years or less. Consumer is required to disassemble product and return-ship unit, then wait for replacement if covered by out-of-area provider.	Industry best. A 25-year limited warranty certificate is issued with each solar attic fan. See written warranty for details.
SOLAR COLLECTOR	
Fixed in flat position. Cannot be aimed towards the sun. No airspace between panel and housing causes panel to be exposed to extreme temperatures.	Adjustable solar Panel can be positioned toward the sun for maximum exposure and performance. Unique design allows fresh air to cool the solar collector and housing.
HOUSING	
Uses various forms of Plastic throughout the fan which become brittle and crack from sun exposure. Use of steel can rust and corrode.	No plastic used throughout the entire product. Only top quality commercial grade aluminum is powder coated inside and out for superior protection.
MOTOR	
Various models made in China and other foreign countries. Noisy operation and found to be unreliable with time.	High-performance DC motor operates almost silently. Backed by the industry's best 25-year limited warranty.
FAN BLADES	
Poor construction made of more plastic components which become brittle and crack when exposed to heat over time.	5-wing precision-balanced fan blade constructed of commercial-grade aluminum. Offers superior performance and longevity.
EXHAUST SCREEN	
Made of plastic which will crack when exposed to heat allowing rodents and insects to penetrate into your home.	Stainless-steel construction will not crack like plastic, preventing even the most ingenious critters from entering.
AIRFLOW ARCHITECTURE	
Basic design provides mediocre CFM performance and shelf life due to plastic parts and foreign assembly (up to 800 CFM).	Increased performance with venturi-effect design offers the ultimate CFM output (up to 1,628 CFM).
WATER RESISTANCE	
"Galvalume" flashing can rust over time. Some manufacturers even use plastic flashing that can crack.	One-piece aluminum flashing provides seamless design paired with unique sealed rain guard to deflect water during even the most extreme weather.
OUTPUT	
Minimal output often rated at 10 Watts, or occasionally 22 Watts. Some brands do not even publish a CFM rating for you to review.	Superior performance with the available 36-Watt model provides maximum ventilation up to 1,628 cubic feet per minute.
COMPANY	
Online shipping, box stores, or out-of-area providers offer less customer service.	Family-owned and operated for over three decades. We offer the best overall experience with local service, support, and custom-tailored solutions for your home.

How it works

The SkyFlex Solar Fan is designed to extract trapped attic heat & humidity by propelling a fan to replace it with cool fresh air provided by the vents around the perimeter of your home.

- **100% Solar Powered**
Cools your home with the power of the sun. No electricity or electrician required.
- **Extends Roof Life**
Extreme attic temperatures damage your roof's underlayment. Extracting this heat prolongs the lifespan of your roof.
- **Decreases Energy Costs**
Air-condition duct work running through the attic can compete with temperatures in excess of 160° F. By reducing this temperature your air conditioner will work more efficiently, which can decrease cooling costs.
- **Reduces Heat, Humidity and Mold**
Hot, humid, non-moving air is a breeding ground for mold and bacteria. Improved ventilation keeps this air moving and replenishes it with cool fresh air that can prevent unwanted contamination.

Quality Components You Can Trust

Industry-leading 12 or 36 Watt tiltable solar panel

Commercial-grade seamless aluminum with powder-coated interior and exterior

High-performance custom DC motor with isolation bracket ensures quiet operation

5-wing precision balanced aluminum fan blade for optimum CFM output

Stainless screen allows maximum flow while deterring unwanted birds and critters

Venturi-effect seamless aluminum flashing provides optimum airflow

Optional automatic thermostat is preset to +/- 85° F
