#### 15. EDITING AN IMAGE WIDGET

You will see you have the option to 'Select an Image' to replace what it already there, add 'Alternative text' and to add a 'Link.' Alternative text is for accessibility and will display if the image does not load in the viewers browser. Please leave the 'Title' section blank unless you want this text to appear above the image. The link options allow you to choose if you want the link to open in a new browser window or to replace the content in your current window. We would recommend opening in a new window so that your website is still easily accessible should the user wish to go back to it. Once happy with your amends, click 'Save'.
