COMPLETE YOUR MODEL WITH THESE DETAILED MACHINE GUNS

Amazing Products Available at WWW.sarikhobbies.com

WORLD WAR I - SPECIAL OFFERS!

Celebrating the launch of 4 classic and scale machine guns for your next build.

Our 3D printed machine guns make a superb scale accessory for RC model WWI fighter aircraft.

The models come as kits that are easily assembled and painted to give your model the armament that is such a prominent feature of these aircraft.

ALL GUNS:

Scale	1:4	£19.95 + p&p
	1:5	£10.95 + p&p
	1:6	£14.95 + p&p

MG 08/15 'SPANDAU' MACHINE GUN

The Maschinengewehr 08/15 was widely used on German fighter aircraft during WWI. A development of the water-cooled infantry weapon, the guns fitted to aircraft had the distinctive heavily slotted air cooling jacket instead. It used belt-fed ammunition and could be synchronised to fire through the propeller arc.

VICKERS MACHINE GUN (JACKETED BARREL)

The Vickers machine gun became the standard armament of British and French WWI military aircraft. It was heavier than the Lewis Gun, but could be synchronised to fire through the propeller arc. Used on aircraft the water cooling system was unnecessary, but the jacket was retained, emptied of water and had gills cut in it to allow cooling air to be forced through it.

LEWIS MACHINE GUN

The famous Lewis Gun was the first machine gun to be fired from an aeroplane. Easily recognised by its distinctive pan magazine, it was reliable and lightweight, and was fitted to many British and French fighter aircraft. It could not be synchronised to fire forwards through the propeller arc, so was often mounted on top of the upper wing to fire over it, or was on a swivel mount and fired by a gunner.

VICKERS MACHINE GUN (FLUTED BARREL)

The Vickers machine gun became the standard armament of British and French WWI military aircraft. It was heavier than the Lewis Gun, but could be synchronised to fire through the propeller arc. Used on aircraft the water cooling system was unnecessary.

See your ideas printed!

The Fisher Delta 1.0 3D Printer is everything you need to print whatever you can imagine!

This fantastic **table top 3D printer** has everything you need to start printing straight away.

Designed and developed in the UK, this printer is designed for reliability, quality and durability. Backed up with excellent UK based customer care service it is simple to use, producing an infinite number of printed parts and components.

Supplied in kit form for only £349 with easy to follow online instructions. All electronics are supplied and ready to use with pre made wiring harnesses - no soldering required.

Buy the printer pre-built and tested for £425.

Additional filaments, parts, heat beds and many more accessories available!

Full specifications, videos of the printer in action and further information is available at www.trapletshop.com

*£349.00 includes VAT but is subject to P&P

FISHER DELTA HEATBED

This product bundle includes all parts required to upgrade a Fisher Delta 3D Printer to use a heatbed print surface. Unleash your Fisher's potential with this heated upgrade kit, allowing you to print in a far broader range of materials, including ABS, PETG, HIPS and many more.

The heated kit is designed to simply replace the standard bed with no disassembly of the machine required and retaining the auto-compensation functionality of the original design. With 120W available the print surface temperature may be raised to 110C, allowing printing with materials such as ABS with a nozzle temperature of 250C.

The upgrade kit includes:

- FISHER HEATBED KIT
- 19V 6.32A (120W) power supply
- Roll of Kapton tape

Product Code: 3DPBED
