ILLINGWORTH INGHAM
M/CR LTD

The Easy And Profitable Way Of Producing Timber Window And Doors.

Especially produced for joiners, woodworking professional and timber workshops our quality window and door kits provide the required finished door or window components all ready for you to assemble.

Our range of machined mouldings can be used to match existing woodwork for graded or listed properties, restoration work or for brand new doors or windows.

How It Works

[illegible]

- Step 1** Phone, Fax or Email to outline your requirements.
- Step 2** We will send you a template to complete to confirm window or door details - size and style etc.
- Step 3** Your quote will be produced within 24 hours.
- Step 4** Order confirmation.
- Step 5** Production.
- Step 6** Window or door kits despatched usually within 3-5 working days, may be longer if a bespoke timber.
- Step 7** You complete assembly. If using friction hinges and multi-point locks you just need to produce a rebate in the sash section. A spindle moulder or similar is ideal for this, but not essential.

For more details or a competitive quote contact our sales hotline on **0161 872 1841**, fax **0161 872 2501** or email **office@iitimber.co.uk**

Kit Form Casement Windows

All grooves keyed for easy fitting of ironmongery.

Whatever style of door you require – patio, bi-fold, external or internal we can provide a door kit that is made to order to your required size.

If the frame is to accept a door bottom you just mortise to accept tenons to complete the assembly.
