

I plan to do the job with cheerfulness and positivity. That's why my cheesy slogan is "SUN": Sustainability, Unity, Nourishment.

- **Sustainability**

I will to build on the sustainability shop, coat swap and removal of single use plastic in college by creating a zero-waste shop. Students can bring their own containers and buy dried goods, potatoes and cleaning products, recycling old containers, saving money and plastic waste. I will also work with outside partners to help with community gardens, the River Clean and anything else that saves students money at the same time as helping the environment.

- **Unity**

To make great things happen, we have to work together. I will encourage students to come up with ideas and give them help to make them happen. This year's events were great fun and brought students together, raising loads for charity. We have more student led clubs and I will build on that to really help create the student community we deserve.

- **Nourishment**

The food that you need to grow and stay healthy. This is not only physical food – we have made plenty of progress in making sure students have access to food with the food bank and Free Food Fridays. We also need to work with Student Services to make sure that students have access to the best resources to mentally grow and stay healthy.

All of these things bring a little bit more sunshine into people's day – and in Scotland we could all do with a little bit more sun!
