About us

We are the specialist supplier of Structural Hollow Sections within Kloeckner Metals UK, a brand that is recognised as a major distributor of Hot Finished Hollow Sections within the UK.

Our extensive stocks of Circular, Rectangular and Square Hollow Sections are distributed from our central stock facility in Leeds. The service we provide

goes well beyond the logistics of stockholding to include value added services and technical support.

The experienced sales team have detailed product and application knowledge, as we work closely with our customers to deliver the optimum solution.

Working with strategic

manufacturing mills ensures the best in both quality and traceability and we can supply lengths of up to 24 metres long from regular mill production cycles.

We are accredited with both EN ISO 9001:2008 and ISO 14001:2004 and all our structural hollow sections carry the CE Mark.

Lengths of 15 metres are available from stock and lengths up to 24 metres are available from new production on short lead times.

Kloeckner Metals UK

Kloeckner Metals UK are the largest mill independent multi metals stockholder & distributor in the UK, and a key member of the Klöckner & Co. group, the largest independent steel and metal distributor by turnover in Europe and North America combined. The nation-wide

coverage afforded by our many sites, each offering a broad array of products and processing facilities, allows us to deliver a personal, local service backed by global purchasing strength. This provides an unrivalled ability to meet the individual requirements of our customer. Our total commitment

to customer service continues to allow Kloeckner Metals UK opportunities to support our customers' needs; be it product range, development of new products or processing requirements. A fast and efficient service is assured.

Services & Products

Interpipe holds a comprehensive range of both Hot Finished and Cold Formed Hollow Sections available from stock. We work closely with a selection of world class supply partners who enable us to source non-standard sizes and grades to meet your specific requirements.

We deliver optimum metal solutions by investing in the latest equipment and technology. Our value added services include laser tube processing, drilling, sawing to length and shotblasting and painting. Due to these extensive processing capabilities we can supply both

bespoke cut to length and repeat batch orders making Kloeckner Interpipe your perfect business partner.

Our standard stock profile comprises of the following;

Hot Finished Hollow Sections to EN 10210 S355J2H

CHS	26.9 – 406.4 mm
RHS	50 x 30 – 500 x 300mm
SHS	40 x 40 – 400 x 400mm
Length	Up to 15.1 metres

Cold Formed Hollow Sections to

EN 10219 S235JRH

CHS	26.9 – 323.9mm
RHS	50 x 25 – 200 x 100mm
SHS	20 x 20 – 150 x 150mm
Length	Up to 12.2 metres

Cold Formed Hollow Sections to EN 10219 S355J2H

CHS	48.3 – 323.9mm
RHS	50 x 30 – 400 x 200mm
SHS	40 x 40 – 300 x 300mm
Length	Up to 12.2 metres

We offer laser tube processing via our multi-axis 3D tube lasers. Fully automated and CNC controlled, means we can cut round, square, rectangular and open profiles cleanly and consistently. We offer this service across all products including Carbon, Stainless and Aluminium metals.

Every saw has fully programmable integrated touch screen PC control and is able to accept cutting data manually, in DSTV file, DSTV + file or Microsoft Excel Format.

Capable of handling many dimensions our processing equipment is perfectly geared to today's client base.

Our drill line has the capacity to automatically process materials ranging in lengths from 2.2 metres to 21 metres, with a manual feed capacity of a minimum of 1.2 metres to a maximum 21 metres.

Programming is in the form of DSTV files, which generates the NC programme for the drilling machine.

Market Sectors

Kloeckner Metals UK | Interpipe supply products which are used extensively in the Construction, Mechanical and Manufactured Good's Sectors for all load bearing applications.

Our commitment to stock, service and our pro-active approach to problem solving has enhanced our reputation to deliver many diverse projects from light fabrications requiring materials from stock to complex landmark projects from specific production cycles.

We supply hollow sections that are used in today's impressive structures such as stadia and aesthetic building applications.

Many of which have been supplied from our comprehensive stocks of Hot Finished Hollow Sections.

Our business is built on strong relationships with the supply chains for both onshore and offshore market sectors. By providing high performance steels, backed with dedicated support and expert advice, Kloeckner Metals UK deliver and surpass the demands of the Energy sector.

We are committed to supplying the nuclear industries requirements in a safe and cost effective manner, whilst assuring the highest standards of quality and practice. We stock a wide range of products where strength, toughness, resistance to fatigue and corrosion are paramount.

We supply customers involved in the demanding earth-moving, mining and material handling sectors with hollow sections that can withstand critical load bearing applications.

Architects and Designers are specifying hollow sections for both pedestrian footbridges and Motorway Gantries as their strength to weight ratio allows for greater spans and minimises material wastage.

It's our in-depth knowledge and deep understanding of this demanding market sector, which makes our wide ranging products and services suitable to the Transportation market. Our high quality internal systems and traceability of products make Kloeckner Metals UK your perfect business partner.
