

ICP RW Tapes

Idler Bars, Compensator Rollers for Web, Flexo and other roll fed press applications

ICP RW Tapes are an adhesive tape/film made of a Triple Silicon Coated Glass Bead technology. ICP RW Tapes are durable and resist ink and adhesive accumulation and helps eliminate marking and scratching on all substrates. ICP RW Tapes are easy to wash and provide advantages over sandpaper type Grip Tapes and Velcro. Available in two surface types, smooth and coarse with a pressure sensitive backing allowing for easy installation and removal.

Features:

Glass Beaded Surface

- Uniform diameter Silicon coated glass beads in a dense matrix greatly enhances its ink repelling properties

Triple Silicon Coating

- Glass beads are sealed to the surface using multiple layers of an oil and ink resistant adhesive with a primer and Silicon top coating

Washable Surface

- The ICP RW Tape can be washed extending its service life unlike grip tapes which cannot be washed

Custom Size Widths

- ICP RW Tapes can be slit to custom widths*

Applications

Commercial Web & Newspaper Presses

- Idler Bars, Compensator Rollers, Guide Plates

Business Forms Presses

- Guide Rollers
