

SHOWMASTER LTD

MANUFACTURERS AND SUPPLIERS OF DISPLAY CASE HARDWARE

UV BONDING

Showmaster are unique in that we can produce UV bonded glass systems using both curved and straight glass we are the first and probably the only glass supplier in the UK that can achieve this.

UV bonding is now one of the fastest moving items in our range and we have been complimented highly on our work in this area.

We can supply UV bonded units with or without shelves and with or without sliding doors and build them to any dimensions and with a variety of different finishes.

Our research in this area has lead us to develop a system that is giving you the highest possible standards of manufacture and aesthetics.

We have developed and built a special facility to keep the glass and bonding at a very critical temperature which is essential for the best results.

We can bond glass from 6mm to 25mm using standard float glass or low iron glass as well as being able to bond other materials to the glass.

We can do almost anything with our UV bonding product and we have the technology to produce whatever your imagination can dream of. With a team of people that are highly skilled and have years of experience working with glass we can produce the finest results seen in the glass industry to date.

Our passion and skill in providing a solution to your needs knows no bounds so dare to dream and we will make that special display item that you require.
