TECHNICAL INFORMATION SHEET

ALBRITE

ALLOY WHEEL CLEANER

ALBRITE is a concentrated blend of inhibited acids and surface active agents specially formulated to remove rust, scale and brake dust from alloy wheels, without hard scrubbing.

Features

Powerful

Effective

Economical

Benefits

A highly active blend of acids and penetrating agents, which combine to remove, even the heaviest build-up of scale and brake dust.

Removes scale and brake dust from alloy wheels without hard scrubbing. Also, removes rust from steel surfaces, replacing it with an inhibited phosphate layer. After treatment, the passivated steel can then be stored prior to further treatment

ALBRITE can be diluted up to 10 parts with water.

DIRECTIONS FOR USE

Dilute with up to 10 parts of water. Spray or brush on to surface and leave up to 5 minutes, before washing off with cold water.

N.B. This product should not be used to clean aluminium with an anodised or special finish.
