# How to discharge in Sikka? We evaluate the limits.

[www.combi-lift.net](http://www.combi-lift.net)

**Reliance Jamnagar III Project (June 2014 – April 2016)**  
Unloading is quite challenging in a place like Sikka, India, where the water depth measures 4.8 m. Combi Lift, based in Bremen, Germany, has mastered this difficult feat. We carried more than 400,000 freight tonnes of exceptional units from Asia and Europe to Sikka – totalling 40 shipments in all. Reliance Industries Limited is using these components for the Jamnagar Phase III refinery enlargement project – to upgrade the world's largest refinery.
