ATV—Apple TV Security Cage

The storage and protection solution.

Introducing the ATV, the security cage designed to secure and protect your Apple TV. This security cage is suitable for all 2nd and 3rd generation Apple TV models available from September 2010.

These units are produced in the UK to our highest quality manufacturing standards and offer a safe and robust storage solution.

The ATV is manufactured from 1.5mm steel and comes in two pieces. Part one is a base fixing plate for securing to the available surface, such as a desk, shelf or table. Part two is the cover which acts as the protective locking plate and encloses the Apple TV unit. The cover is secured into position using two low profile joiners with a quarter turn keyed locking mechanism.

The front and rear of the cage has retaining arms to prevent removal of the unit but allows for cable connection and keeps the front open for use of the remote control and to enable the LED to be seen during operation. The units have been painted in tough gloss black powder coat to ensure that they are able to withstand the knocks and bumps associated with daily use in any busy environment.

The cages have been designed with security in mind, that's why the fixing holes face inwards towards the centre of the unit. Once fitted and an Apple TV is installed it is not possible to access the fixing screws and hence you can be sure that the unit will remain where you fit it.

A final benefit to this unit is that it can be installed on any surface including tables, desks and walls. It can also be installed in any orientation to match the chosen destination location.

Dimensions:

105mm long x 130mm wide x 30mm high.
The ATV is suitable for all 2nd and 3rd generation Apple TV models available from September 2010

All units are supplied boxed. Please note that we do supply fixing screws but these will need to be checked for length prior to use as alternatives may be required specific for the type of table or desk that is to be used.

We are also able to offer these units for custom applications and in other sizes. Front and rear blocking/masking or door options are available as specials upon request. On large quantities we are able to offer colour options or modifications please contact us for further details.
