From our factory in Warwickshire in the Midlands we have been manufacturing our exclusive range of affordable, high quality spiral stairs since 1987. We supply direct to both to private and commercial customers throughout the UK and the rest of the world.

Our spiral stairs are individually handmade from a range of materials such as cast iron, steel, hard wood and stainless steel to your specific requirements and our technical department can advise you on any spiral stairs required to meet Building regulations BS5395.

The Traditional

Available in sizes from 1020mm to 1830mm diameter. With larger sizes available to meet specific requirements. This image shows how the stair not only provides a practical solution with a small footprint, but is also aesthetically pleasing.

Stair and landing balustrading can be made up of numerous combinations such as the basket double twist and the square double twist used in the stair shown. Our technical team will be happy to provide advise on your specific design of your stairs and landing.

This practical spiral staircase is ideal for Barn conversions or serving a Mezzanine or balcony. This image shows the solid wood beech treads with the balusters attached. This stair has been fitted with a metal riser bar to adhere to the 100mm gap rule and is generally used when small children are using the staircase

Landings can be supplied to fit round or square holes or as in the stair illustrated "free space" with the landing providing the connection to the upper floor. Please ask about the height of stair risers. Elite can produce lower rise steps, making walking up and down them easier for the old & very young.
