HALO™ by Insafe

PROTECTS • MONITORS • ALERTS • TRACKS • REPORTS

- **Your valuables are protected by the safe, the safe is protected by the lock and Halo protects and monitors its use**
 - Tested by VdS Class 2 and UL Type 1 according to EN1300 Level B standards
- Halo is an intelligent security solution integrating unique security features and services to protect cash and valuables up to Grade 5 (*Cash cover £100,000 & Jewellery/Valuables up to £1 million)
 - Halo is monitored by a Cat 2, NSI Gold accredited Alarm Receiving Centre (ARC) operating 24/7, 365 days a year, within guidelines of ISO 9001, ISO 27001 and BS 5979
 - Halo uses a secure standalone 4G network ensuring a reliable and robust system
- Insafe provide a remote programming and reporting service for configuration, updates and user management

Silent Duress Alarm

- Duress code - signals the user is under threat and sends notification to the monitored Alarm Receiving Centre (ARC)

GPS/GSM Tracker

- Real time tracking with GPS accuracy provides instant location and history
- Next to real time monitoring of the position of the safe
- Track your safe in the eventuality that it is stolen

Seismic Monitoring

- Seismic device installed
- Monitored by the Halo system
- In the event of attack, the monitored seismic will alert the monitoring station (ARC)

Mobile App + One Time Code (OTC)

- Extra 2 step verification
- Issue a code allowing one time access to the safe
- Simply login to App; Insert 4 digit pin; App generates OTC
- Added layers of security through issued App-based code
- Ensures the same code is never used twice

Networked

- Next to real time monitoring of the safe's use through a secure standalone 4G network
- Remote programming and reporting

“ Money and passports can be replaced,
but your Grandfather’s Pocket Watch, Mother’s Pearls,
Old Love Letters or Baby’s First Tooth
are priceless one-offs. ”

HALO WILL MONITOR AND TRACK THEM SHOULD YOUR SAFE BE STOLEN
